## The Pilot Fine Writing success story

At the crossroads of generations since 1918

The first pages of our history are written about Ryosuke Namiki and Masao Wada, who started out as merchant marine engineers. In 1918, they created the Namiki Manufacturing Company and their first gold nib made in Japan was produced, as well as the first fountain pens.

In 1938, the Namiki manufacturing Company became the Pilot pen Co Ltd to pay tribute to their other shared passion, the sea. The pair used the brand name PILOT, more modern, referring to the fleet's flagship. Today, our 100 years of know how and your support allow us to be one of the leading manufacturers in the high-end writing in the world.

Thank you to all our handwriting enthusiasts for continuing to trust us in the choice of their writing instruments.

## Capless

A unique pen, at the forefront of technology in 1964

The Capless was created in 1963 in Tokyo and its retractable version in 1964 for the Olympic Games in Japan. This fountain pen houses a mechanism allowing its nib to retract and thanks to it, you can write with the same hand without a cap... Hence comes its name: the Capless fountain pen.

Now mythical, the Capless won the high-tech award in 1965; it has since conquered the world and all those who love to write with a Japanese quality pen. Capless's retractable 18 -carat gold nib is a patented system, making it a unique, revolutionary pen that combines practicality, comfort and writing pleasure. More than 30 finishes in different nib sizes are available today to seduce all types of writers.

*Dream, live, write*

Falcon

A composite image featuring a man's profile in a sepia tone. The interior of his head is filled with a landscape of rolling hills and a winding path. A small silhouette of a falcon is shown flying above the man's head. To the right, a vertical fountain pen is displayed. Below the pen, the word "Falcon" is written in a clean, sans-serif font. A thin horizontal line runs across the bottom of the composition.

# Falcon

*Its timeless design and feather recall the majestic bird. The Falcon has a major advantage: an incredibly flexible nib! Adapting to the writing angle of each user, it makes writing fluid and easy, especially cursive, by facilitating upstrokes and downstrokes.*

● 14K gold rhodium-plated nib
